The Oil, Paint and Drug Reporter is read every week by the men who dictate the buying policies in the manufacturing industries which consume heavy and fine chemicals, dyestuffs, paint and varnish materials, oils, crude drugs, waxes and fertilizer materials, and it is likewise consulted weekly by the men who direct the selling operations of the industries producing these materials.

An analysis of the circulation of the Oil, Paint and Drug Reporter shows that 78% of its readers are proprietors or administrative officials; 65% are purchasing executives. The remainder are identified with the direction of sales operations.

The Oil, Paint and Drug Reporter circulation statement is based on actual copies mailed per issue and not on yearly or other averages, and its guaranteed circulation is exclusive of the circulation of convention, annual review and other special numbers. It has no bulk or promiscuous sample copy distribution.

Your advertisement in the Oil, Paint and Drug Reporter would be read by those whose business is worth while having.
